

The image features a green-tinted savanna landscape. In the upper left, a silhouette of a bull's head with large, curved horns is shown, with its eyes glowing in a bright green light. In the center, a large, dark silhouette of a tree stands against a background of rolling hills. In the foreground, three elephants are silhouetted against the landscape, walking from left to right. The text "BuySell coin" is prominently displayed in the upper right quadrant, and "WHITEPAPER" is at the bottom center, both in a bold, glowing green font.

Introduction

On planet Earth, there are about 9 million species of living creatures. About 80% of them are not open. And maybe humanity will never know about them. The reason for this is the mass extinction of living organisms mainly because of human activities.

At the moment more than 40% of all known living species on the planet are under threat of complete extermination.

Being the dominant species, a human can and should be responsible for his neighbors on the planet. But instead, in pursuit of personal comfort, prestige and banal commercial gain, we daily severely exterminate hundreds, thousands of creatures, who are only to blame for the fact that their genome is different from ours.

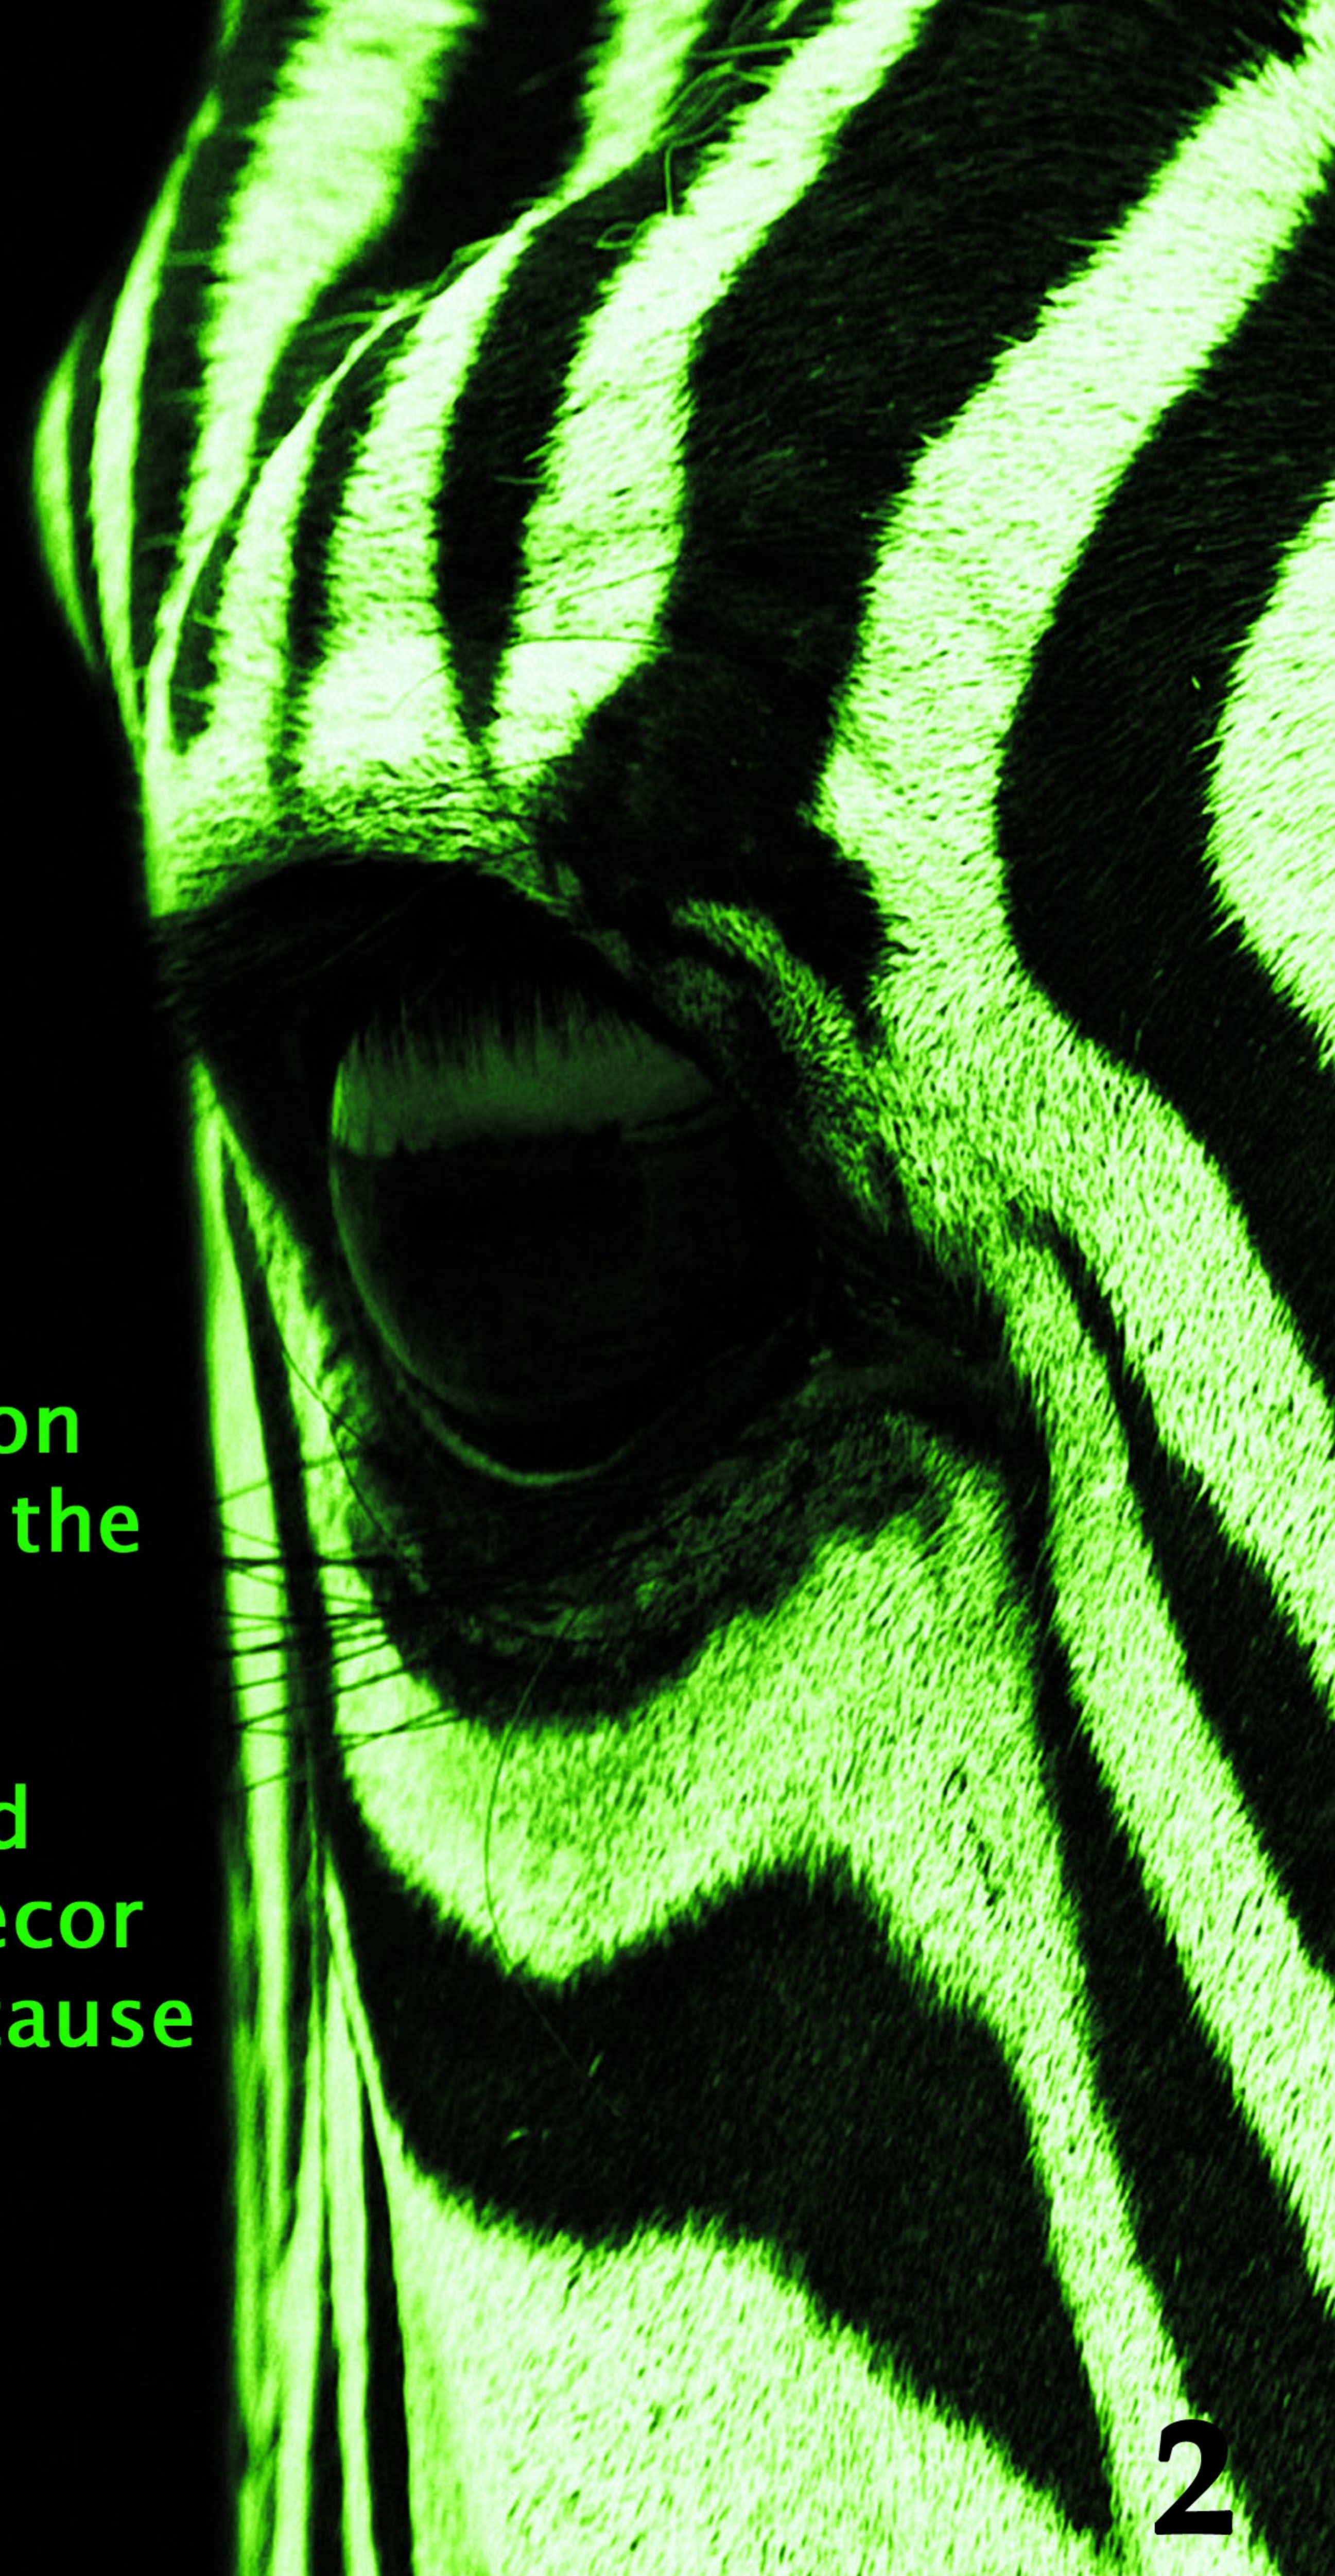

The disappearance of only one species from the biological chain in only one region can lead to a number of irreversible changes!

And what can happen if 40% of species cease to exist in nature?

- Other animals will also die after them, predators who will not have enough food.
- Without a constant supply of humus, soil will no longer be fertile, the crops necessary for man will cease to grow.
- Plants, which give us not only food and clothing, but also vital oxygen, will start to die.
- Without living organisms that purify water, we soon will not be able to drink without being poisoned by the products of our industry.

And this is just the tip of the iceberg.

Usually we do not even think about such things, and kill animals in huge quantities: for food, clothes, decor items ... and some animals die for nothing: just because we turned their habitat into a dump.

Our Idea

We want to somehow return the debt to nature and decided to dedicate to this our new project. Part of the funds (namely 4%) from the sale of masternodes and POS-packages will be transferred to charity. After the end of the pre-sale, we will launch one masternode, the profit from which we will transfer to the fund.

We chose the organization IFAW (International Fund for Animal Welfare), as it has made the greatest contribution to the protection of animals. This largest international animal welfare fund also saves some of our smaller brothers, homeless animals in distress, and entire populations, and also cares about keeping their habitat comfortable and fit for life.

The organization was founded in 1969. Now IFAW is developing its projects in more than 40 countries around the world.

In our power to change everything. The more people who understand the extent of their responsibility and support the International Fund for the Protection of Animals, the closer we are to the future in which a person can live in harmony with other species. Caring for the homeless and other animals, we make a contribution to the future of the Earth.

Why should you choose BuySell Coin?

Buying the masternodes of BuySell Coin, you are contributing to the donation, which, perhaps, will change the future of our planet.

At the initial stage, funds will be transferred to charity in dollars. In the future, we plan to introduce BuySell Coin into this sphere and make transfers in the crypto currency.

Enumerations will be made once a month. Information about transactions will be made public.

With the listing to the stock exchange, the withdrawal of funds will be gradual, so as not to shock the market.

BuySell coin

Coin specification

Coin Name : BuySell

Ticker : BULL

Coin Type : POW/POS/MN

Algorithm : Scrypt

Block Time : ~60 sec

Block Size : 2MB

Block POS Reward: 1-4 BULL

Rewards MasterNode : 85%

Rewards PoS : 15%

Block POW Reward: 0.1 BULL

Masternode Collateral: 1000 BULL

Total Coins: 11,264,000

Total Premine: ~195,000 (1.73%)

Minimum Stake Age : 6 Hour

Coin Maturity : 89 Block

RPC Port: 42516

Network Port: 42515

Roadmap

STAGE 1

- Idea Elaboration
- Market Analysis
- Technical description and elaboration of the roadmap
- Creating a theme on Bitcointalk
- Creating a Community in Discord
- Create Twitter page
- Launch Website
- Whitepaper publication

STAGE 2

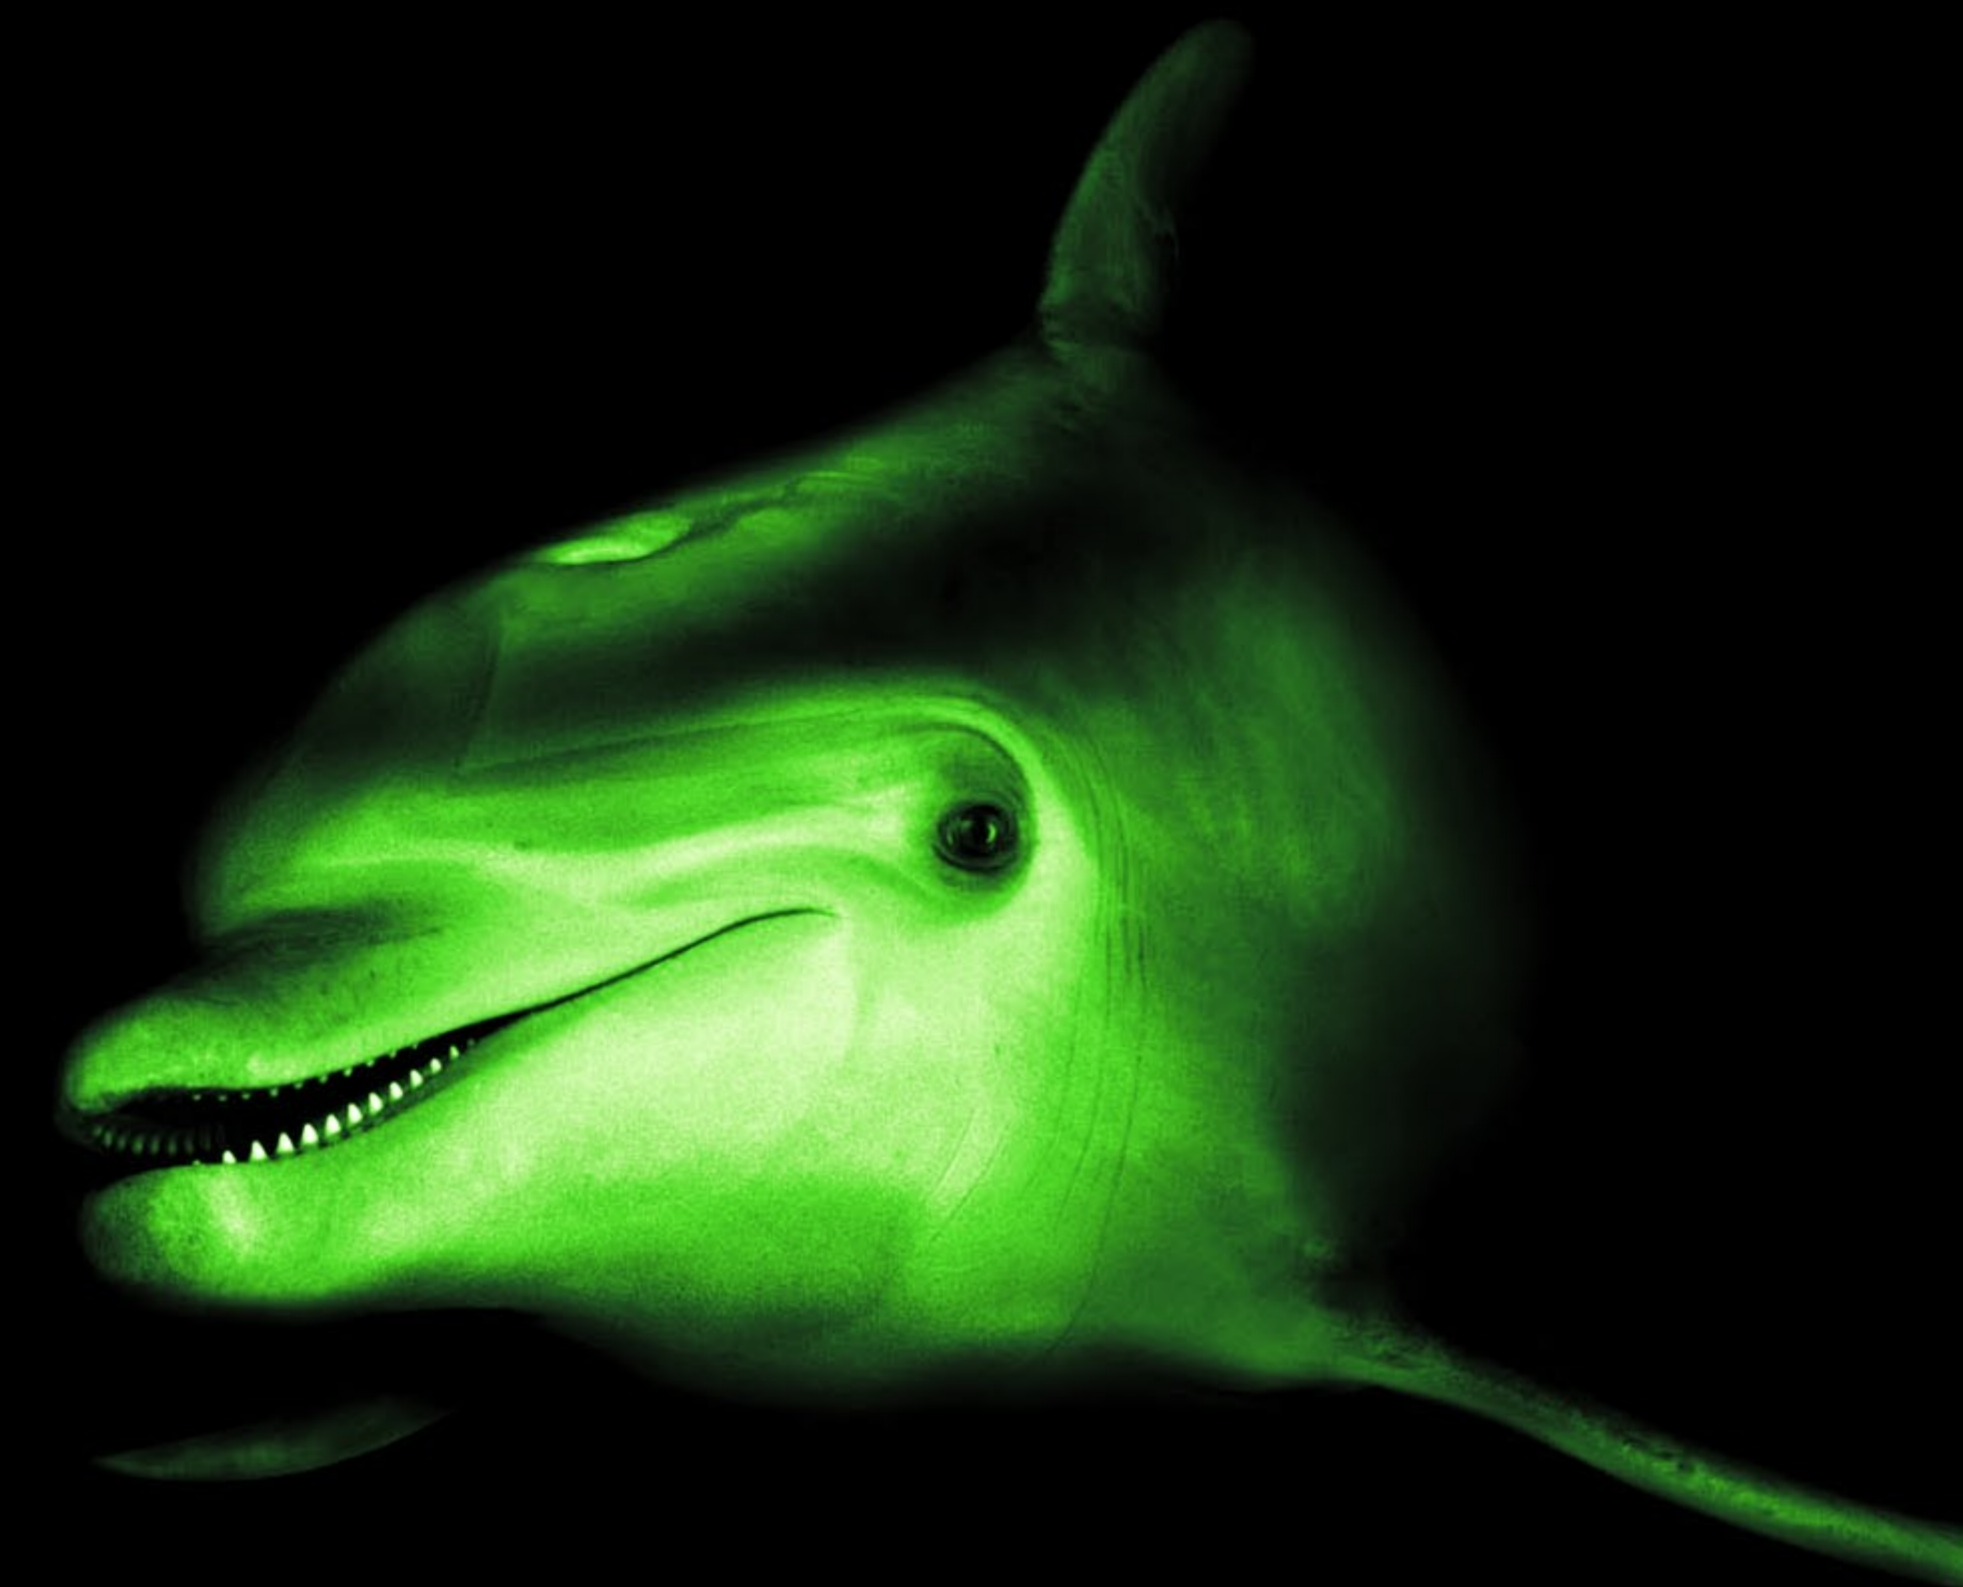

- Creating Linux daemon
- Creating a wallet Linux
- Network testing
- Network launch
- Creating a wallet Windows
- Creating a wallet Mac
- Block Explorer launch
- Private presentation with investors
- Bounty campaign
- Marketing campaign
- Presale
- Donate to IFAW

STAGE 3

- Listing on Masternodes.online
- Request for listing on CryptoBridge
- Listing on Cryptobridge
- Launch MN for charity
- Request for listing on Coinexchange
- Listing on Coinexchange
- Donate to IFAW

STAGE 4

- Establishing partnerships with world-renowned animal welfare organizations
- The introduction of crypto currency into the field of charity for the animal welfare organizations
