INMAX

Dependable Digital Asset Exchange

Introduction

Cryptocurrency trading is gaining more popularity, particularly during the last few years. Many platforms have been there in the market. Unfortunately, many of them fail to meet what the customers really need in trading. Yes, every trader needs an advanced but user-friendly trading interface as well as professional but low-cost platform. In other words, simpler digital asset exchange means many things, like:

- User-friendly interface
- Reliable platform
- No downtime or lagging
- Low-cost fee models
- Fair trading fees
- Simplified withdrawal system with low-cost fee
- Faster KYC/AML verification process and registration steps

- 2FA Features
- Improved transparency
- Responsive customer services

INMAX comes as a novel cryptocurrency trading platform with the abovementioned advantages. This is an Asian-based digital asset exchange, which focuses on the ultimate customer experience in many ways. Founded by PT. HAFIZC KOIN ASIA – a company that has so much experience in cryptocurrency trading, INMAX offers a simpler but more advanced platform design and high-quality customer support. These made INMAX a dependable, faster, easier, and safer trading platform.

Vision and Missions

INMAX was born from a vision to develop “A dependable digital asset exchange and financial system for all.” To achieve the vision, INMAX has the following mission, which determines how it deals with the customers, the team, and the society:

- 1) Treating the users with care, honesty, responsiveness, and respect
- 2) Creating a fun and positive trading environment;
- 3) Maintaining a learning environment, which enables the company to be better from time to time;
- 4) Offering the ultimate customer services;
- 5) Applying the latest technology to produce streamlined trading process.

We translate the missions into every aspect of our business strategies. We know that every customer wants to be treated with care. Therefore, we attempt to provide the users with a responsive and caring trading platform, where every trader can learn and share each other. This allows us to create a system, where everyone contributes to the company success.

By creating a learning environment, INMAX has a commitment to improve the services from time to time. We learn from every single mistake, story, and achievements we make. We evaluate the achievement regularly to identify where we are and where we want to go. This way, we can design a better platform that addresses any identified problems.

Our Team

INMAX has a commitment to be the leader in digital asset exchange. For this, we work with young, talented people, who have the required competence, skills, and experience in developing digital exchange platforms. Our team consists of professionals, innovators, experienced investors and traders, and young technology experts, who regularly update their skills and knowledge on cryptocurrency industry. We select the team members carefully to make sure that the candidates meet the specified criteria.

We know that cryptocurrency is a rapid growing industry, and we are happy to be a part of it and contribute for it. We believe that our trading platform will help shape a better financial system in the future. Our teams keep working to develop better systems that offer the traders with advanced but simple platforms for every trading activity.

We continuously seek for input from varied sources, like the users and the community. Therefore, we are convinced that INMAX will be able to provide more services of digital financial systems.

Why Choosing Inmax

INMAX offers digital trading services for a number of digital coins, like BTC, NEO, ETH, XLM, XRP, and many more. We trade services digital coins in pairs of BTC, ETH, INX, and IDR. To give the users with convenience, INMAX comes out with a number of advantages, as the following :

Secured

INMAX uses 100% offline wallet; therefore, it is very powerful to overcome Ddos attacks. We know that every user looks for a powerful and secured trading platform. Therefore, we make saving your funds and personal information the first priorities in our services. We do the following steps to make sure that users only use fully secured platform:

- Frequent and regular system updates. We use the latest software supported by the newest system security technology.
- Regular security checks and updates. We are developing algorithms to identify suspicious trading patterns as early as possible.
- Information backup for all data. The backup is executed automatically on daily bases. Then, the data are sent to cloud-based storage for improved safety.
- Information backup for all data. The backup is executed automatically on daily bases. Then, the data are sent to cloud-based storage for improved safety.
- Using the most sophisticated and powerful firewall.
- Using anti-DDos services to make sure that financial transactions are free from any kind of interruption.

Authentication

Any transactions in INMAX are supported by Two-Factor Authentication (2FA) feature, including deposit, withdrawal, account shift, account editing, and many more. The system is also known as multi-factor authentication (MFA). It is actually a device-based system, but the device can be connected to internet when needed. This offers improved security with additional layer for online environments, such as digital financial transactions. The most common device used for 2FA feature is a mobile phone.

The conventional password-only approach is known to have some vulnerability, particularly due to many log-ins. As a result, cloud-based personal data are at increasing threat. With 2FA feature, INMAX offers complete security without compromise. Besides username and password security models, 2FA feature offers the users with following benefits :

- Physical wallet that no one else has (mobile phone and PIN number of the phone.
- Immediate notifications of log-ins, withdrawal, and other vital actions. The notifications come with a link that allows the owners of digital wallet to freeze he account in case that you find suspicious transactions.
- Detecting changes in IP/location
- Chances to restrict account access and withdrawal based on IP and location.

Faster

Matching engine is the key software that supports electronic trading platforms like INMAX. The engine works with faster allocation process by matching up trades, bids, and offers. INMAX is supported by high-speed matching engine, which does not recognize any lags or downtime during the trading session. As a result, traders can react to changes in prices and market conditions in a quicker way.

High-speed matching engine used by INMAX is built with the latest technology, which enables it to maintain performance despite growing user bases. It is hardly affected by the growth in tradable assets and spikes in transactions. The result is a stable trading platform, which benefits all traders. We are optimistic that INMAX platform will result in minimum, if any, order rejection because of system overload.

Best Response

We offer 24-hour customer services to answer any questions related to our platform. We are supported by team members, who are ready to help you in addressing any issues related to the trading platforms, any questions related to the cryptocurrency trading, and any problems you face.

Cold Wallet

Cryptocurrency traders are exposed to increasing threats from time to time, as they are constantly connected to internet. Traders who keep hot digital wallet are vulnerable to hackers, particularly when it keeps considerable amount of money. The case is different with cold wallet, which works offline. Why?

As the wallet is not connected to internet, hackers cannot access and steal digital assets in it. INMAX offers cold wallet to help secure your money. Our cold wallet is equipped with multi-sig technology, which is designed to improve storage security. With INMAX trading platform, you benefit from hacker-proof digital wallet.

However, it is okay to keep small amount of balance in your hot digital wallet. The hackers are not interested in accounts that only has small amount of money.

High Liquidity

INMAX is supported by sophisticated technology for generating and maintaining any kinds of digital wallet in a safe way. Our team members do their best to generate secured digital wallet that protects your money from any efforts of hacking or stealing.

Low Cost Fee

We support your trading activities with low-cost fee. You may wonder how we can do this, right? Increasingly efficient process in order allocation eventually drives down the transaction fees. It takes less time and fewer steps to execute any orders, while market quality is improved. Similarly, we try to implement fair trading fees to help the users feel comfortable with the system. Low-Cost fees apply for varied transactions, from deposit, trading and withdrawals.

Stop Loss Methode

Stop Loss is the lowest price limit set to limit losses. When price movements touch this value, the system will automatically close the order or position. so that traders can apply good management assets

Unlimited Withdrawal

Unlimited withdrawal in our features is asset withdrawal with no maximum withdrawal limit, which is very supportive for users more freely maximizing cross-market trading strategies and opening large opportunities for market players who have large assets to transact in inmax market

INX TOKEN

INX is a utility token, which is used on INMAX platform. The utility token allows the owner to utilize the coins in real-world business. In the end, the tokens would have digital assets with real values

name	: INMAX
ticker	: INX
platform	: ETH
type	: ERC-20
decimal	: 8
total suply	: 7.000.000
smart contract (hash)	: 0x018d7d179350f1bb9853d04982820e37cce13a92

Benefit of INX Token

INMAX uses INX tokens to power the platform, as it is supported by blockchain technology. It allows us to implement dynamic currency supply model. As a result, the transactions can be set up based upon the deal funding or dividends. In addition, the INX token is gaining popularity in various financial transactions. Many fundraising sessions use a smart contract, which uses INX to buy shares.

The INX tokens support high-volume financial transactions without compromising the speed. This is what traditional crowdfunders could not enjoy. More interestingly INMAX offers the owners of INX tokens the following benefits :

- ❖ Benefit of INX Token is low-cost withdrawal fee. You can get up to 90% discount of the trading fees only by making payments with INX token. Withdrawal fees are commonly drawn from the network's transaction fees, while the traders withdraw their coins. INMAX is able to impose low-cost withdrawal fees because of faster transaction process, which minimizes the network's costs.
- ❖ INMAX exchange is setting a plan to open premium token listing. The premium access will be charged by 3333 INX per token listing. Then, the INX result of the purchase will be locked for one year.
- ❖ INMAX will also offer free token listing access with VOTE system. The free listing events will be held every month. Every user is required to pay 1 INX for every vote (1 account, 1 vote). After the event, we will BURN the INX results of all votes for the contest every month.

It shall be noted, that INX is not designed to have any particular value outside of INMAX Platform. INX being a contractual means of payment (an alternative to legal tender) on the Platform may only be used as a direct means of payment between the Registered Users that accept INX on the Platform. INX has no purpose other than to be a means of payment on the Platform and does not entitle its holder to any pre-paid service, good or any right against INMAX Platform Operator or the Company or any other third party. INX does not entitle its holder to any stake or any interest in the INMAX Platform Operator or the Company by virtue of acquiring INX and neither will INMAX give the holders any automatic rights to the assets, dividends, revenue or interest in the INMAX Platform Operator or the Company.

INX Sale

INMAX will hold INX Sale, a digital asset that is used to facilitate the distribution of profit generated by INMAX platform. In addition, holders of INX token will get many benefits, as described above. If you want to enjoy the benefits too, make sure to participate in the following schedule of INX sale programs :

first sale	1 INX = 0.0069 ETH
(20 Nov - 07 Dec 2018)	supply 1,000,000 INX
second sale	1 INX = 0.0078 ETH
(08 Dec - 23 Dec 2018)	supply 1,000,000 INX
third sale	1 INX = 0.0083 ETH
(24 Dec - 27 Dec 2018)	supply 1,000,000 INX

As mentioned above, the faster you buy the INX tokens, the cheaper the price you have to pay. The sale program will account for only 3,000,000 INX. After the sale session is over, you will have to pay for the INX tokens at normal prices.

How to Buy INX TOKEN

Currently, you can buy INX tokens directly. INX is still to be listed in official exchanges. We are optimistic that more and more exchanges will offer INX tokens. When they are available at exchanges, buying INX tokens will be much simpler. Under the current system, you can buy minimum of 0.25 ETH and the token is automatically sent to your digital wallet.

Distribution of INX Token

As mentioned above, a total 7,000,000 INX tokens will be supplied. INMAX an innovative distribution model for distributing the platform benefits to the owners' digital wallet. The token distribution is divided into four general stages. Check out our roadmap to see when you can get the INX tokens in each stage :

Airdrop & Bounty

2% of the INX tokens – 140,000 INX – will be distributed during the Airdrop & Bounty program. The Airdrop & Bounty opens in November 2018 and ends in February 2019. We distribute the airdrops and bounty as free money for clients that meet the specified criteria. You can meet certain criteria to get the free coins in your digital wallet.

Token Sale

As mentioned above, we design three sessions of token sale, which will cover 3,000,000 INX. This accounts for 43% of the total INX. Token Sale program begins in November 2018 and ends in January 2019. This is your chance to get the INX tokens at cheaper prices.

Incentive Payment Reserve

In the future, we will provide the chances for owners of INX tokens to be part of INMAX. We allocate 35% of the tokens – 2,460,000 INX to a discretionary incentive payment pool. We may distribute the incentives based upon the specified allocation criteria which are strictly at the discretion of INMAX Platform Operator and the Company. For the avoidance of doubt, that INMAX will not grant holders any automatic right to receive profits, income, revenue or other payments or returns arising from the acquisition, holding, management or disposal of, the exercise of, the redemption of, or the expiry of, any right, interest, title or benefit in the INMAX Platform Operator or Company or property or to any return on investment.

Team

We allocate 20% of the token for team development. Be the part of our team to get additional token.

SUMMARY

AIRDROP & BOUNTY	:	2%	=	140,000 INX
TOKEN SALE	:	43%	=	3,000,000 INX
INSENTIVE PAYMENT	:	35%	=	2,460,000 INX
TEAM	:	20%	=	1,400,000 INX

FUNDS

We manage the funds to build a team, develop, promote, and manage the projects. Our emphasis is on the performance, platform safety, as well as user experience that provides the customers with more trusts. We have a commitment to manage the fund in a professional way for INMAX development. The funds are allocated for the following programs :

Marketing

This step is the key for introducing INMAX to the public. Therefore, we allocate 30% of the fund for marketing. We use a number of media to promote the platforms, since the airdrop and bounty program to the operational stages. Marketing is a continuous branding process, but we will make necessary adjustments based upon the marketing performance. A number of marketing programs have been listed in our schedules, including:

- Airdrop and bounty program, which distributes free coins based on certain criteria, such as loyalty, innovation, or contests
- Reward programs
- Community collaboration program
- Social media marketing
- Website development, and many more

Research and Development

INMAX is still in the development process, but we are optimistic that it will be fast-growing cryptocurrency trading platform, thanks to the advantages we offer. We allocate 15% of the fund for research and development. Our teams work continuously to find creative ideas on how to grow INMAX. The fund will be used for the following activities :

- Developing Web-Based, Android-Based, or IOS-Based platform. These provide the users with flexibility to manage their accounts and execute transactions anywhere.
- Doing market research to find out how the community will accept INMAX and INX tokens. This is an important strategy to determine whether current strategies work on the desired way or not.
- Development of traders' retention programs, such as buyback scheme.
- Continuously testing the platforms to see whether it has some vulnerability to external attacks.

Product Development

INMAX allocate 20% of the fund for product development. The fund is expected to produce the following things :

- Variations in the platform services.
- New products that address the problems faced by the traders.

- Offering new tools to use by the traders and to help them in making decisions related to their investment.
- Development or trade matching engine to make sure it works in an optimal speed, regardless of the transaction density. This is the core of any digital financial platform.

Working Capital and Operation

INMAX uses 30 % of its fund for these two aspects. Working capital and operation costs determine how the business and services are going. We need to make sure that everything runs in the expected way. The customer services are available 24 hours a day. The trading platforms functions well. The team members work in a cohesive way, and many more.

Legal

It is true that legal aspect is still to be addressed in most countries. However, INMAX is committed to promote and encourage cryptocurrency industry to get legal acknowledgement. We allocate 5% of the fund for coordinative tasks. We do proactive approach to make sure that the operations run in a legal way.

INMAX takes many important steps to implement internal procedures that comply with internal regulations. We have a policy that forbids money laundering practices, financing for drug and human trafficking, corruption, bribery, and terrorism.

We are also taking some steps to minimize the risks of illegal activities by applying Anti-Money Laundering (AML) and Know Your Customer (KYC) Policy. Implementation of the policy includes use verification procedures, monitoring transaction, assessing and mitigating risks.

SUMMARY

MARKETING	:	30%
RESEARCH & DEVELOPMENT	:	15%
PRODUCT DEVELOPMENT	:	20%
WORKING CAPITAL	:	20%
OPERATION	:	10%
LEGAL	:	5%

ROADMAP AND DEVELOPMENT PLAN

INMAX is setting a plan for specified schedule. We are doing some projects aimed at providing the users with convenient services. Our professional teams are working on the following projects:

INMAX App

We agree that community is getting smarter and smarter from one day to another. They demand simpler and streamlined process in every type of transaction or trading activities. Of course, technology offers the solution. Our target is to release INMAX App for iOS and INMAX App for android in January 2019.

When the project is complete and the apps are released, the users will have more flexibility to manage their investment. They can control the account, edit the profile, and execute the trading transaction only with few taps on the phone keypad. With INMAX App, control over your account is in your hands.

Payment Gateway

We also vision to provide the traders with a secured payment gateway. Our team is working on the project. This will provide the users with secured, powerful, and simpler payment. The payment gateway will be accessible by phone, thus allowing the traders to make payment while they are away.

Master Card / VISA Payment Release

With Master Card / VISA card, payment of transactions, such as deposit, will be much easier. You can use the Master / Visa credit card to make payment. Whatever the bank you use, you can make payment instantly. INMAX is developing a special payment gateway for the users of Master/VISA card

Development of Loyalty Programs

Of course, there are many ways to attract young talents in a company. However, not all of the strategies work for them. While you get the young talents, the bigger challenge is retaining them. Young professionals love flexibility in their working space or working hour.

Therefore, INMAX needs to design loyalty programs to retain the young talents. For instance :

- Chances to become part of INMAX. You can buy INMAX shares at the Federal Reserve
- Programs that motivate the working motivation. They may include contest, bonuses, or rewards.
