Introducing Crypto Sports

Crypto Sports builds a bridge between eSports and the crypto world, offering gamers and developers innovative ways to connect and provide opportunities for every gamer, whether casual or professional, to make money by doing what they love, thanks to the **Crypto Sports Network** and the cryptocurrency, **CSPN**.

Introducing the Crypto Sports Network

With the **Crypto Sports Network**, our key focus is to maximize our development in the blockchain technology alongside other integrations for gamers and developers. The vision of the network is to offer gamers a new and comfortable environment providing them with full support where they can connect with other gamers, stay up to date on the latest eSports news, increase their fan base and connect with followers & clan members. In addition to this, gamers can also win prizes in **CSPN** by playing against fellow gamers, participating in tournaments or taking part in eSports bets. This also gives a way for gamers to purchase hard- and software as well as merchandise with their earned **CSPN** coins within our very own eStore.

The Crypto Sports Network platform functionality

Profiles

- **Gamer:** Users can register free gamer profiles on the **CSPN** platform where they can share their information, embed media channels, and link to external profiles like facebook, twitter, ESL, etc. Every Gamer account gets its own **CSPN** web wallet to make use of the **CSPN** services.
- **Clan:** Gamers can create clans and invite other gamers to it. The clan owner can give permissions to chosen clan members to administrate and manage the clan. Every clan gets its own web wallet where members can deposit **CSPN** to set up a clan masternode or play matches for **CSPN** against other clans.

- **Company:** Company accounts need to go through a verification process first. Once verified, companies can create their own tournaments and make use of the advertising and crowd funding functionality the **CSPN** platform provides.

Communication

Users can communicate with each other by using the provided chat and blogging functionality.

Matches

Gamers/clans can search & find matches to play against other gamers/clans for **CSPN**. Both sides agree on a specific **CSPN** amount to put into the prize pot and the winner gets it all. Crypto Sports provides solutions for clarification in the case of disputes like uploading demos and screenshots. The prize pot would be locked until both sides agree on the result / the dispute is resolved.

Tournaments

Gamers/clans can participate in tournaments to win prizes in **CSPN**. Official tournament matches are being supervised by **CSPN** staff members.

Contests

Users can participate in different contests to win prizes in **CSPN**. Tasks can vary from designing a new header image up to winning the most 1on1 matches in a certain period of time.

eSports bets & lottery

Users can take part in eSports bets and the official **Crypto Sports** lottery to gamble for **CSPN**. This functionality might be restricted to certain locations for legal reasons.

Livestreaming

Viewers have the ability to support Let's Players by sending tips in **CSPN** as well as executing interactions to have some fun with the other viewers and to help the streamer climb up the **Crypto Sports** scoreboard.

Masternode service

The **CSPN** platform provides a fully web based easy masternode setup functionality giving the possibility to fully manage masternode rewards. This way clans can easily setup automatic reward sharing with their clan members.

Shared masternode service

The **CSPN** platform provides a shared masternode service for investors that don't have enough coins to run a **CSPN** masternode on their own.

Crowdfunding

Verified game developers can use the **Crypto Sports** crowd funding functionality to raise funds for their projects in **CSPN** and let funders take part in its development.

eStore

In the **Crypto Sports** eStore users are able to buy gaming hardware & equipment, software in form of digital download codes & license keys as well as merchandise with **CSPN**.

News blog

The **Crypto Sports** news blog keeps users up to date about what's actually happening in the eSports world.

Further functionality will be revealed upon development.

Introducing the Crypto Sports Currency (CSPN)

CSPN stands for **Crypto Sports Network** and is also the core of the eponymous platform. Besides Proof-of-Stake (PoS), CSPN also provides Masternode (MN) functionality which is fully integrated into the **Crypto Sports** ecosystem and allows instant and secure private peer to peer transactions within the **Crypto Sports Network**.

CSPN Specifications

Name: **Crypto Sports**

Ticker: **CSPN**

Algo: **Quark**

Type: **MN / PoS**

Reward split: **80% / 20%**

Block reward: **3 CSPN (annually decreasing by 6.7%)**

Block time: **60s**

MN collateral: **1337 CSPN (133t)**

Max supply: **13.37M CSPN**

Premine: **850k CSPN**

The Public Redemption

We are excited to announce our plans to merge 3 communities into 1 by providing a swap for HTRC, VYI and GOSS to **CSPN**. The public redemption will take place on a fully automated platform and will last 5 weeks giving the following swap ratios:

week 1 (HTRC only): **250:1** | week 2: **250:1** | week 3: **275:1** |
week 4: **300:1** | week 5: **325:1**

*We provide a full swap for HTRC and VYI and a partial swap for GOSS, giving GOSS the same amount of **CSPN** as we give to VYI. HTRC and VYI will be removed from all exchanges before the redemption takes place. More information and dates will be released soon.*

The Crypto Sports Roadmap for 2018 & 2019

December 2018

1. Get **CSPN** ready.
2. Prepare the redemption platform for automated swapping of HTRC, VYI & GOSS to **CSPN**.
3. Publish the **Crypto Sports** landing page.

Q1 2019

1. Release the **CSPN** wallet to the public.
2. Let the public redemption take place.
3. List **CSPN** on first exchange.
4. Publish the official **Crypto Sports** website.
5. Create the promotional banner and advertise **CSPN**.
6. Closed alpha testing the **Crypto Sports Network** platform (**CSPN** platform) base functionality:
 - gamer & clan profiles
 - chat & blogging functionality
 - match system

Q2 2019

1. Release of the official **Crypto Sports** whitepaper.
2. Closed beta testing the **CSPN** platform base functionality (Community involved).
3. Open beta release of the **CSPN** platform.
4. Extend the **CSPN** platform functionality by implementing the tournament and livestreaming system with **CSPN** tip functionality for Let's Players.

Q3 2019

1. Promote the first **CSPN** tournament.
2. Present the **CSPN** platform to potential partners.
3. Extend the **CSPN** platform functionality by implementing the contest system.

Q4 2019

1. Implement the masternode (full node) service into the **CSPN** platform.
2. Present the eSports betting system to potential partners (closed beta).
3. Create the **Crypto Sports** promotional video as part of the marketing campaign for 2020.

Further exchange listings will be revealed upon development and are not specified in the roadmap.

Final Words

We, the **Crypto Sports** team, are very excited about the merge of HTRC, VVI and GOSS into **CSPN** and we are looking forward to experience this journey with you together as a great community.

Stay informed about the state of development by joining the official **Crypto Sports** Discord server: <https://discord.gg/vVqU7b7> and Telegram group: <https://t.me/joinchat/JN8SKE2LzFruJ2Afqme3HQ> .

Thank you for reading.
