

FORTFC

SIX PAGER

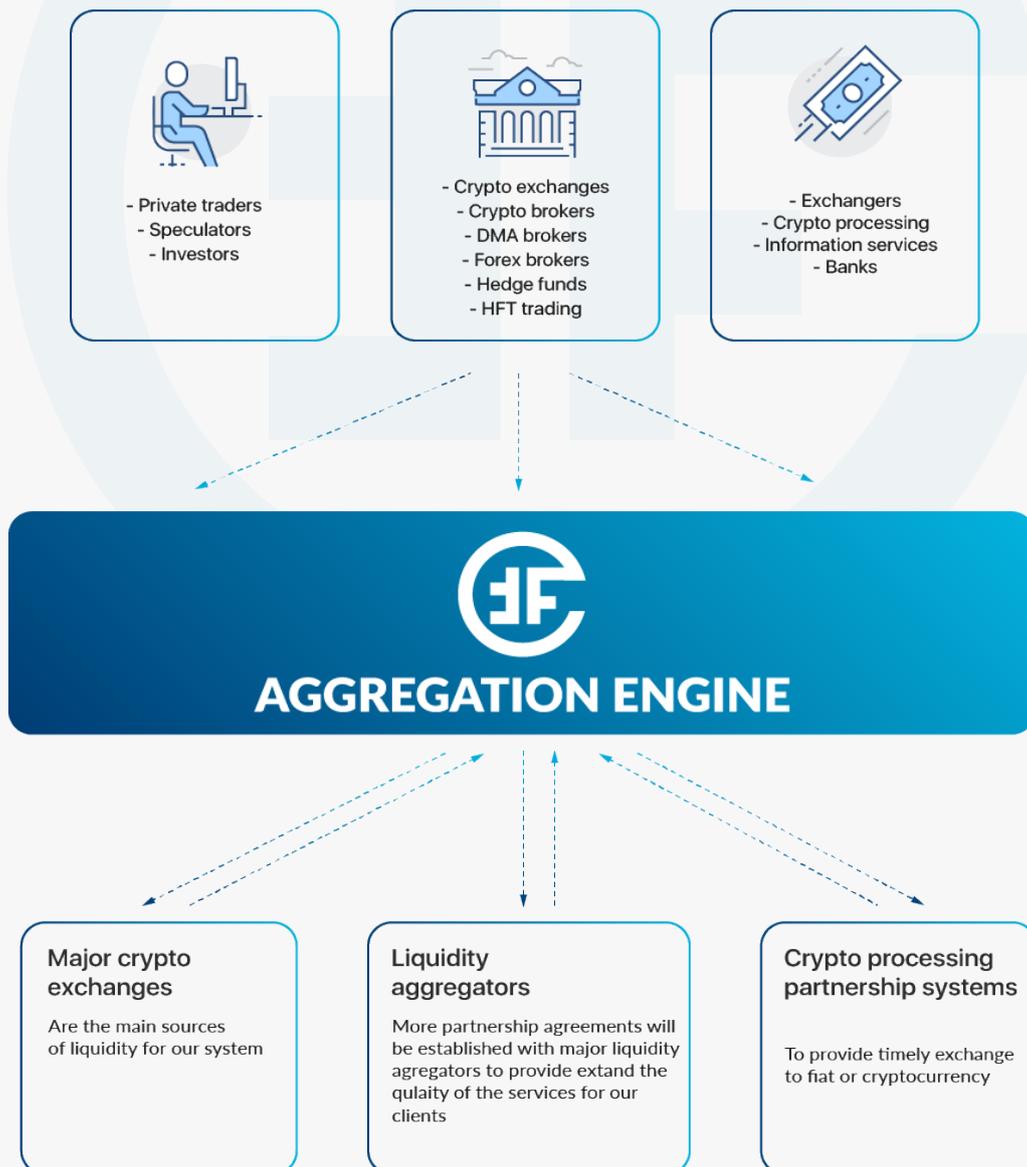

**UNIQUE CRYPTOLIQUIDITY
AGGREGATOR**

What is FortFC?

FortFC is a liquidity provider on the cryptocurrency market that aggregates buy and sell orders simultaneously from a pool of the most popular world exchanges and accumulates the necessary liquidity volume at the right time specifically for its customers. The unique set of services includes online Deposit / Withdraw / Exchange of various cryptocurrencies for another cryptocurrencies or converting crypto into fiat currencies with the most favorable rates on the market.

How does FortFC operate?

FortFC is already a successfully operating platform. You can try the demo version using the following link <https://download.mql5.com/cdn/web/fort.financial.services/mt5/fortfs5setup.exe>. The project is already connected to Poloniex and Bitstamp exchanges and continues to establish new platform connections to the largest crypto-exchanges, which will act as the primary source of liquidity for the company's customers.

FortFC project history

FortFC is the part of the international holding FFS, founded in 2010. The holding has been consistently growing with various companies: the international licensed broker Fort Financial Services (FortFS), which serves more than 150 thousand customers worldwide and has been successfully developing for more than 8 years, as well as several IT companies specializing in software development for the financial sector.

What services does FortFC offer?

A wide and flexible set of unique services guarantees FortFC the competitive advantage of a global liquidity provider on the crypto-currency market. The convenient terminal with simple and functional API, FIX protocol connection to the trading platform, transparent conditions, fast and professional support service, deep liquidity, the highest quality execution of transactions regardless of volume, wide choice of ways to deposit / withdraw funds - all these benefits are highly appreciated by our customers.

Why do we believe in our project?

The competitive advantage of FortFC is based on the unique set of services that brightly distinguishes our product from other offers on the market. FortFC is created by a close-knit team of professionals of FFS international holding which has been operating since 2010.

Based on the calculations, even with the most conservatively predicted number of connections to the innovative service of FortFC, the organic demand for the token is turning out to be 24,226,891.70 EUR.

Consequently, due to the created deficit, the demand for service provided by FortFC will secure our token from being unprofitable.

What are our plans?

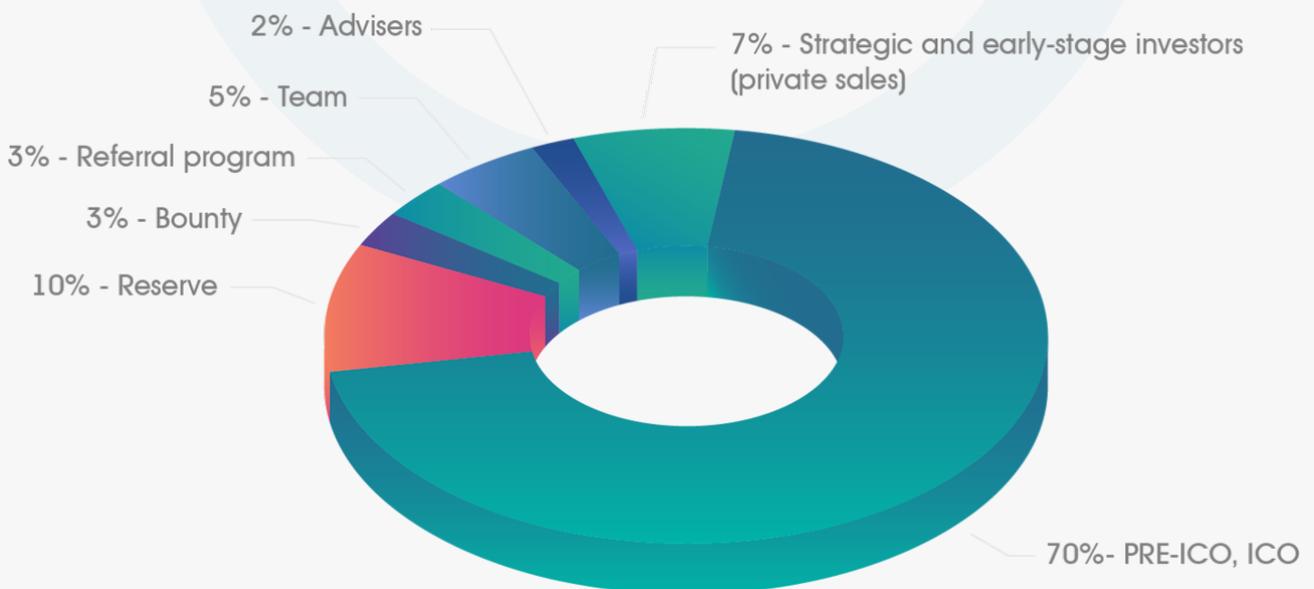

Targeted financing of the project will be carried out according to the stages presented in the Road Map.

	PRODUCT	BUSINESS

Tokens #FortFC Coin will be distributed as follows:

What will the funds be allocated to?

Who will implement the project?

Chief Executive Officer **Evgeny Filichkin** graduated from St. Petersburg State University with a major in jurisprudence and from the Rotterdam School of Management with an MBA. He has a certificate of qualification from the Central Bank of Russia as a brokerage specialist, dealer, and granted the right to hold executive positions in securities management. In 2005 he received a brokerage license and a certificate for the Russian Federation Stock Exchange to conduct futures and options transactions. Mr. Filichkin has been working in the Forex industry for nineteen years—from customer support manager to senior executive—and has held executive positions at Henyep Group and E-Global Trade & Finance Group, Inc. He is the founder of the FFS holding company and is a managing partner at FortFS and FortFC.

Chief Financial Officer **Natalia Kryachkova** graduated from the Finance Academy under the Government of the Russian Federation with a major in Finance and Credit and is a member of the International Compliance Association (ICA). She has an International ICA Certificate in Compliance and ICA Certificate in Financial Crime Prevention. In 2005 she started at the OOO BukhExpert audit company and, since 2012, she has been the financial director of the FFS LTD holding company.

Chief Information Officer **Anton Stavinsky** graduated from Russian State Social University as an information security specialist. Since 2012 he has been the CIO at the FFS LTD holding. He is responsible for the strategic development of the company in the field of IT technologies, IT services budgeting, and the software-development management and IT team (software developers, system developers, network administrators, programmers, testers, and support specialists).

Chief Operating Officer **Oleg Nazarov** graduated from the Saint Petersburg State University of Aerospace Instrumentation as an economic major and has an Organization and Personnel Management diploma from the Open University Business School, studying administration and risk management of MetaTrader 4, MetaTrader 5, Currenex, and Strategy Runner trading platforms. He has had continuous professional experience working in large brokerage companies since 2006 and, since 2008, in management positions. In 2012 he became the COO of the FFS LTD holding company, where he is responsible for the implementation of new developments and systems of positions hedging and risk management. He has experience in cryptocurrency markets since 2015.
