

x6coin

A new approach to charitable giving on the blockchain.

I. INTRODUCTION

x6coin is a basic income distribution model developed to help low income families in the Philippines and in other third world countries around the world. x6coin is a medium of exchange for charitable works. Basic income is generated only from staked X6 coins. Staking can be done with the QT Wallet, as well as the Web Wallet.

II. SPECIFICATIONS

- Hybrid Scrypt Proof Of Stake (POS) Cryptocurrency
- Max Supply - 60,000,000 X6
- Stake Reward Rate = 20%
- Main Net Launch Date = November 4th 2018
- 300K Pre Mine (100K On 3 Super Nodes) For Processing Transactions

III. USE CASE

X6 is a unique approach to charitable giving. When a donation is made, that donation can then be staked by the recipient, turning that donation into a way for the recipient to further generate income from it. This is very important in helping achieve the goal of X6 by bringing basic income generation to poverish or unbankable countries through acts of charity. All of this paired with the nature of blockchain technology makes for a very effective way to bring basic income generation to those who need it..
