

BARE

⦿ White paper

INTRODUCTION

Bare coin is a cryptocurrency for safe and anonymous payments on Bare platform. Bare platform is a platform for adult content.

Bare coin uses Proof of Stake algorithm with masternodes implementation. Proof of stake provides better network security because every single transaction have to be confirmed by all masternode owners. In exchange masternode owners receive rewards - passive income without electricity bills.

Bare coin is not your average cryptocurrency, it is not 100 % dependent on market “mercy” and purchasing power of crypto investors. We release Bare coin together with its “real life adoption” solution. Bare coin buyers are potential users of Bare platform (more in ch.2) and that will insure demand for Bare coin on the market.

Bare platform is an adult content platform for consumers and content creators. Potential content creator registers on our platform, fills out profile and posts their photos. Potential consumer performs same actions but instead of filling out their profile with photos they start browsing for content. When our potential consumer finds what/who they were looking for they can spend Bare coin to access creator's private content and many more.

BARE PLATFORM

What is Bare platform? Pornography, nudity, adult content of any kind and form is an important part of adult's sexual activity and everyday lives. And despite loads of content for every taste we rarely get what we wanted. Bare platform will provide exactly what consumer needs. How? Every consumer on a platform can create a request for certain content, get a price tag and either pay for it alone or with help from other interested consumers.

We create a comfortable platform for both sides, every content creator will specify their preferences and taboos and every request for content creator must be created considering their taboos and preferences.

Bare platform functionality does not end on requests. Consumer can subscribe to favorite content creator. Subscriber will get access to exclusive content and chats with creators. Following Bare platform releases will include video content and streaming (see roadmap).

Summing up, Bare platform will be as comfortable as possible for both sides. Support your favorite creator and fulfill your desires as a consumer or monetize your content and grow your audience as a content creator. And all with Bare coin, anonymously and safely.

🎯 BARE PLATFORM ECOSYSTEM

Bare platform will strive for a comfortable ecosystem in which both parties work in balance. Ideally, we will achieve mutual respect with minimal intervention by moderators. In reality, there will be tools accessible for users and moderators to maintain this comfortable coexistence.

01 Refund

Content creator will have limited amount of time to fulfill a request. It will depend on its complexity. Content creator will decide how much time they need to complete a request (request cost is decided by creator too). Amount of time and money must be approved by request creators. As soon as community or single bidder pays for request countdown begins. If requested time ends and content creator does not complete request (delays are discussed between bidders and content creator) all Bare coins invested in it are refunded to bidders. Before request time ends all Bare coins are locked.

02 Subscription

Access to exclusive content and interaction (chats, videos, streams).

03 Report

Hereinabove we talked about comfort. Report is one of the most important tools in Bare platform ecosystem that will insure users comfort. For example, moderator does not have direct access to private messages. Through report tool content creator or consumer can submit screenshot with bannable messages and wait for moderator's decision.

04 Likes

Like request to increase its popularity. The higher the popularity of a request the higher the probability that administration decides to take part in bidding.

05 Taboos and preferences

Content creator specifies their taboos and preferences and consumer creates request considering them. Violations will result in a report and request removal.

06 Tags

Simple search for already created content or preferred creator.

BARE COIN

01 Anonymity

Nobody will know that money came from, or left adult content platform. Your bank doesn't need to know about your foot fetish.

02 Resistance to inflation

Small reward for one block won't create oversupply (see coin specs).

03 Staking and masternode rewards

Passive Bare coin income.

04 Voting

Don't like where Bare coin and platform moving? Community can give ideas for masternode owners to vote for.

05 Governments

Constant support for service development.

06 Real life adoption

With Bare coin crypto investors don't have to wait for services to start accepting cryptocurrencies. Bare coin is already supported by a platform that provides popular and necessary product.

COIN SPECIFICATIONS

Algorithm	Consensus Mechanism	Ticker	Block Target	Pos/Mn reward	Stake minimum
Quark	Pos / Masternodes	BARE	60 seconds	15%/85%	100
Total supply	Block maturity	Premine	Min stake age

PRESALE

We are working through presale to gain financial support for Bare platform development.

Bare team will grow with hired programmers and designers, we will start marketing campaigns to promote Bare platform and attract users and content creators.

Presale money will go into platform and coin advertising, listing on exchanges and info services (Masternodes online, MNrank).

Total premine - 35k

Presale - 30k

Presale bonus - 1k

Invite and twitter bounty campaign - 2k

Dev funds - 2k

ROAD MAP

Idea

2019 Feb - May

We developed the Idea of service, created website and coin.

Launch

May-June 2019

Launched Bare coin, ANN and marketing campaign. On this stage we should complete presale to get money for listing on exchanges and platform development.

Listing on exchanges

June 2019

Listing Bare coin on 2 exchanges, masternode services and other coin info services. Developing our community and hiring more team members.

CONCLUSION

Anonymity and security, inflation resistance, user and community oriented. This is Bare coin.

Bare coin block rewards were made small so that there were no coin and masternodes oversupply.

Bare team decided to work through presale. Project's budget will be used to hire new professionals, to draw attention of users and content creators via marketing campaigns, for Bare coin listing on exchanges and info services and many more.

Comfort, choosing content that is right for you, different ways of interaction between user and content creator, community or solo driven content requests . This is Bare platform.

Moderation, convenient content search, taboos and preferences, refund and likes are tools that users, content creators and Bare team will use to maintain comfortable coexistence on Bare platform.
