

MNPOSTREE.COM

MNPOSTREE IS A CRYPTOCURRENCY INVESTMENT PLATFORM.
WE LOOK BEYOND THE TRADITIONAL MASTERNODE + POS MECHANISM

INCOME STREAMS

We offer multiple income streams for MPTC masternode owners.

MN REWARDS

By running a masternode, you can generate income from masternode rewards.

DIVIDEND SHARING

MNPOSTree pays dividend sharing from the profit made on the platform both from masternode sharing service and validator nodes.

INCREASE VALUE

This attracts investors and organically will grow the value or price of MPTC

MNPOSTREE PLATFORM

MASTERNODE SHARING SERVICE

It is a masternode pool service where investors can join shares and share profits.

NON-CUSTODIAL PROOF OF STAKING

DeFi or Decentralised Finance has been a hot topic these days. With Validator – Delegator system, non-custodial staking is possible. This system has been proven safe from hacking.

MNPOSTree Platform will run validator nodes and delegators can join in our staking pool while their coins remain in their private wallet

PURPOSE OF MNPOSTREE COIN (MPTC)

CROWD FUNDING

The sales of MPTC will be used as the seed capital to buy required amounts of coins to run a Validator Node, to fund infrastructures, to fund development, operational cost and listing on major exchanges.

DIVIDEND SHARING

This is how we increase the value of MPTC. We run business from the coins sold on the market and share the profit to all masternode holders equally. The more masternode you have the bigger your dividend sharing from our Validator node and masternode sharing service fee.

MASTERNODE REWARD

Running a masternode will secure MPTC blockchain network and you can gain rewards from it
