**EXCHANGE TOKEN 'EX'
WHITEPAPER**

October, 2021

www.elitex.exchange
listing@elitex.exchange

INTRODUCTION

EliteX exchange is launching its very own native exchange token “EX”.

EX is created for the sole purpose of reducing trading costs within the EliteX exchange ecosystem, giving traders more possibilities to trade and make the EliteX brand more known in the crypto environment.

EX will give a 50% discount on trading fees to traders who decide to pay for their trading costs with EX. This feature can be turned on or off by every user. EX can also be used for farming, staking and much more via partner DEX platforms.

EliteX stands for transparency and therefore conducting the launch without ICO, without team tokens or hidden data. Launch will take place in October 2021 via DEX platform’s Coinswap Space.

Before the launch, nobody, including the team, will not have any tokens. Read more in the “launch” section.

TOKENOMICS

Name: EliteX EX

Ticker: EX

Decimals: 18

Contract address in BSC:

0xE787bd27C2fa7518d1944576dc55c2AcEAeDb719

Initial supply: 30 000 000 (fully utilised for initial liquidity)

Max supply: 100 000 000 (locked for Farming and Staking rewards)

OVERVIEW

FOUNDING TEAM HAS NO TOKENS

Usually when new crypto projects are launched, its creators are selling tokens to new people to receive funds for different purposes like advertising, listing fees or development. EliteX credit token (EX), will be launched without team tokens. This means that team members would also need to buy tokens with their own personal funds, which will make it fair to all other participants and will also make the price increase faster.

NO PRESALE

As there is no IEO, ICO or an angel investing round, our mission is not to search for new people to receive funding, but to make the project grow as fast as possible for every participant.

All initial movements are going through the Coinswap's exchange smart contract which is audited by CERTIK (<https://www.certik.org>). Every purchase is visible in the blockchain and totally transparent for all participants.

LAUNCH IN OCTOBER WITH 30 000 000 EX

30% of all the EX, will be added to a smart contract together with 50000\$ in BNB.

This guarantees that everyone who would decide to sell, will have instant liquidity at any given moment.

ONLY 100 000 000 EX

The total quantity is 100 Million EX and the team is not able to create more, which creates perfect ground for long term growth.

BURN EVERY QUARTER

EliteX will be buying back EX tokens from the free market with the profits of the exchange every quarter.

Total 20% of the quarterly profits of EliteX exchange will be used for buying the EX from the market. First Burn will take place on 15th of January 2022.

This strategy was used also by Binance with BNB and It was extremely successful for the token holders.

FARMING

All the tokens that are left over from the launch (70million) are moved into Multi signature wallet and will be used solely as farming and staking awards.

Farming itself is an extremely profitable solution for the token holders to earn interest by just holding the EX in the farm.

LAUNCH & LOCKING

LAUNCH WILL TAKE PLACE 10TH OF OCTOBER 2021 AT
3:00 PM CET

The Team will Launch 30% (30 000 000) of EX tokens via
coinswap.space's decentralized exchange.

LIQUIDITY

30% or (30 000 000 EX) are paired with 50000\$ BNB liquidity
into a smart contract (approximately 110 BNB), which means
that the approximate launch price is 0.00167\$.

Since noone owns EliteX Credit tokens at first (including the
creators), then every purchase will increase the token price.
Whereas 50000\$ extra purchases would already double the
price of the token and for example 5 million dollars of
purchase translates to token price approximately 0.167\$,
which means 100x growth for the first buyers.

COINSWAP FARM

25 000 000 EX locked in contract :

0xa8f49b0414cfe4827deabc04b532e86aale8383c03850652bbcf0b229fc31633

LOCK IS VALID UNTIL 15. DEC.

After 15th of December, these tokens will be moved to the Pancakeswap staking smart contract.

On the 17th of December, Pancakeswap is opens farming for EX/CAKE, where 17 000 000 million EX will be locked until the total quantity is farmed.

To farm EX on EX/CAKE contract, please follow the instructions in Pancakeswap or ask for extra help in EliteX's social media channels.

IMPORTANT: Noone, including the contract creator CANNOT withdraw the Coins from smart contract!

STAKING 'EX'

Launch of the Staking Contract takes place at 20.10.2021. All the staking activity takes place in Coinswap.Space DEX.

Staking Contract will be available for with annual yield of 250% (Staking rewards for the user are paid out with EX tokens)

To participate in Staking, users need to own only EX Tokens.

The process works in 2 steps:

1. Buy EX and store it In your Metamask wallet (or any other in the list in www.coinswap.space)
2. Enter "STAKE" in www.coinswap.space and add your EX tokens to the stake and you are done.

After starting the staking contract, each user will receive new EX every day until UNSTAKE has been activated or until the contract ends.

If staking is no longer appealing for you and you wish to withdraw, then all you have to do is just move step by step backwards from the instructions above.

FARMING 'EX'

Launch of the Farming Contract takes place at 16.10.2021.
All the farming activity takes place in Coinswap.Space DEX.

First Farming Contracts will be available for [CSS-EX] with an annual yield of 240%. (Farm rewards users with EX tokens)

To participate in Farming, users need to own CSS and EX at least in the same value of the moment of the transaction.

This process works in 3 steps:

1. Buy both tokens and store it In your Metamask wallet (or any other in the list in www.coinswap.space)
2. Enter "LP manager" in www.Coinswap.space by adding both tokens into Liquidity. Now you now have a CSS-EX LP token in Your wallet instead of BNB and EX separately.
3. Enter "Farm" in www.coinswap.space and add your LP tokens to the farm and you are done.

After starting the farming contract, each user will receive new EX every day until the user will UNSTAKE or until the contract ends.

If farming is no longer appealing for you and you wish to withdraw, then all you have to do is just move back in steps from 3 to 1.

EXCHANGES

EliteX native exchange token, EX, is a decentralized token in the BSC Binance smart chain.

During the launch, EX will be immediately listed in Coinswap Space Decentralized exchange as BNB/EX currency pair.

Right after the Launching period, we will also list EX into EliteX exchange forming EX/BNB, EX/USDT, EX/CSS and EX/BTC pairs.

In October, we will also list EX in Pancakeswap to be more attractive to traders and build a bigger and a stronger community.

During the next 2 month period we will also list EX to several other Mid size centralised exchanges to engage more audience and give traders more room to choose.

As many cryptocurrencies dream, we also desire to be listed in Binance, Huobi, Kucoin, etc and the journey towards these top platforms is already beginning.

All listings will be announced in our official social media channels.

COMPETITION

The most successful competitors who we can bring out are Binance BNB, Huobi token and crypto.com CRO.

All of them have been in the market for several years and have become the Top cryptocurrencies in the market.

We are not considering them as the competition who we need to fight against, but rather the companies from whom we can learn the most.

Because of the success of these currencies for their exchange community and early investors, we have a big advantage to replicate their business model and add on new features that would also put the EX token into the list of the top cryptocurrencies in the market.

Apart from using EX as an exchange internal token to reduce trading fees which also is successfully done by aforementioned projects, we have major differences that speed up the growth of the EX token.

We are launching our Token for our community via DEX (decentralized exchange), which gives our users a lot of extra transparency and a bigger chance of getting higher returns to early birds due to the fact that no-one will hold any tokens before the launch.

We believe that launching the token with this strategy will engage more audience and create higher momentum, which will lead to a happier community and a bigger audience.
