

**ElonHype**

# WHITE PAPER

JANUARY 2022  
VERSION 1.0

# ABOUT ELONHYPE

A BEP-20 MEME token built on the Binance Smart Chain.

ElonHype is a new cryptocurrency that will grow with every Elon Musk tweet.

For every Elon tweet hundreds of coins are launched 99.9% of which are scam and only a few make 100x.

The concept behind ElonHype is that you don't have to look for new highpriced coins, just be with us. We are a completely legit development team that will take care of your profits.

We are not a one-day token and our task is to gather a strong community interested in token development.

ElonHype - it's main token. For every new Elon Musk tweet, we will make our own hype token with rewards in ElonHype.
