PCAP TECHNOLOGIES

Executive summary

PCAP is a financial upheaval all set to change the manner in which clients execute. This TRON Blockchain-based multi-utility cryptographic assets is the drive of PCAP Technologies.

PCAP tokens can be used to represent an investor's stake in the company or they can be used for an economic purpose, just like legal tender. This means token holders can use them to make purchases or they can trade tokens to make a profit.

PCAP TECHNOLOGIES

PCAP TOKEN

The base blockchain technology of PCAP Token is TRC-20. The functionality and security of PCAP Token is similar to TRON .

Tron is a blockchain-based decentralized digital platform with its own cryptocurrency, called Tronix or TRX. Founded in 2017 by a Singapore non-profit organization, the Tron Foundation, Tron aims to host a global entertainment system for the cost-effective sharing of digital content.

Initially marketed primarily in Asia, Tron had now gone global. The platform had more than 50 million accounts as of August 2021.

PCAP Token is a multi-utility token and can be used in almost all industries. The list of industries it can be used in includes but is not limited to the following only:

- E-Commerce
- Shopping
- Software Services
- Real Estates
- Trading
- Hotels
- Finance
- Ticket Bookings

PCAP TECHNOLOGIES

TOKEN DETAILS

TOKEN SUPPLY

All supply of TOKEN is capped. Therefore, at least, 55% of the Tokens were made available for trading after the successful launch of the network platform. Team and advisors will get access to the PCAP TOKENS for distribution after one year of ICO.

TOKEN INFORMATION

Token Name: Parachain Advanced Protocol

Symbol: PCAP

Total Supply: 10,00,00,000

Decimals: 18

Smart Contract: TNNJPvhrSYGCGvMByRadGs5r8M67k2bcgu

Standard: TRC-20

TOKEN FEATURES

Security

Cryptocurrencies can be stored in special virtual wallets, secured with a private key. This means that only the holder has access to the accumulated funds. In order to increase security, the virtual currency owner should incorporate encryption technology on their storage devices.

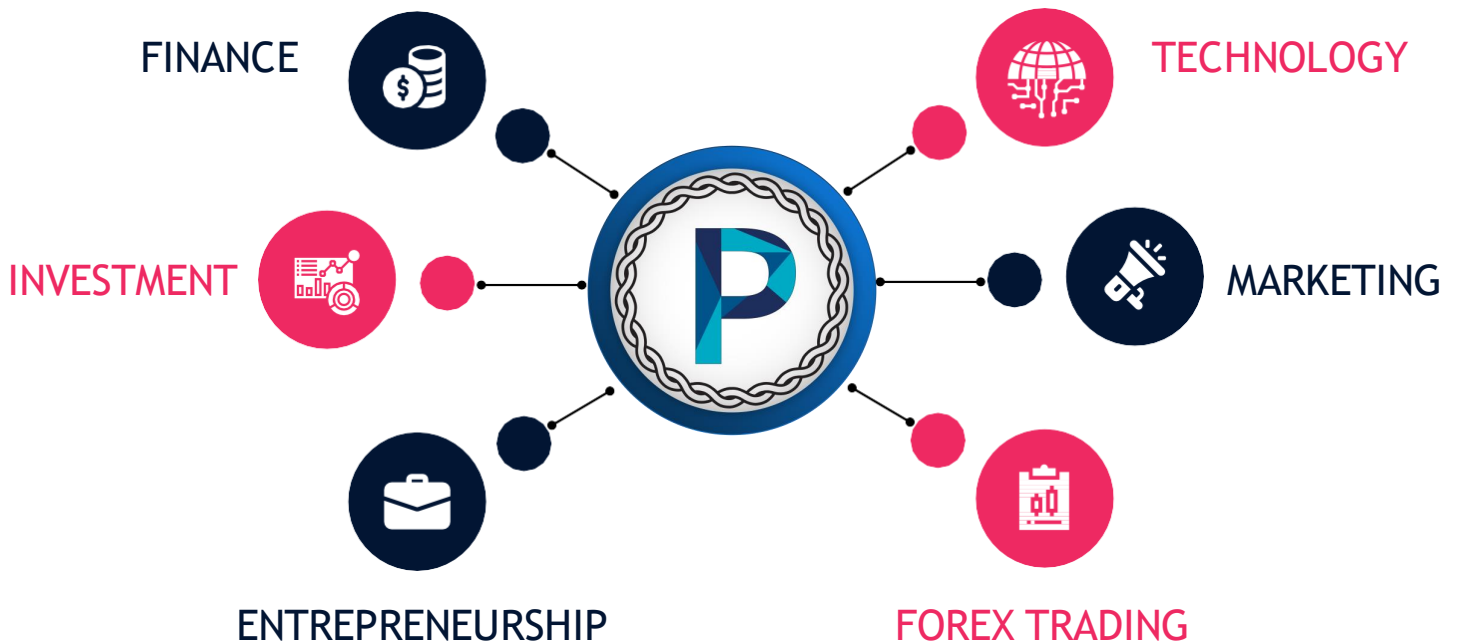

No centralization

There are no authorities controlling cryptocurrency flow or quotations. Virtual currency trading is not located in one single place. This prevents trading disruptions after hacking attempts. Transaction data is dispersed across the network as it is stored directly by cryptocurrency holders.

Irreversible transactions

Due to the lack of institutional supervision over the virtual currency market commissioned transactions cannot be reversed. If error occurs, for example, incorrect recipient details, there is no organisation that can help with the mistake.

All of these team members are heavily loaded with the wealth of experience and practical knowledge about the following:

core committee:

At least 35 management level members will be part of this team.

All of them will add value to the project using the wealth of their invaluable experience, project management skills and knowledgebase.

They will mainly have experience related to the fields/industries already specified in the previous point.

All 35 members in this part of the team will be heavily experienced finance and ecosystem advisors and consultants.

PCAP WALLET

WALLET

A decentralized cloud-based system is implemented to achieve this feat to make sure users do not lose their private key. However, in case some user does not have that private key to help them gain/regain access to their funds in their wallet.

The main purpose of this application is to help users protect their cryptocurrencies in free and trade them at affordable cost without requesting personal information.

BLOCKCHAIN FEATURES

ROADMAP

Powered by Blockchain and smart contracts, PCAP is developing a global data-driven platform for the world.

Roadmap will help you understand the project in detail. You will get the idea of future offering by this roadmap.

PCAP

TECHNOLOGIES

2021

Launching of PCAP Token on TRC-20 Standard. Start ICO, Start Building Community

2022
