

\$Rocket (🚀)

Rocketpaper version 0.2
8th of June 2023

Introduction

Launched in June 2023, Rocket is a decentralized financial (DeFi) token on the Binance Smart Chain (BSC) network that aims for the Moon, Mars and to go beyond the stars. It's the most recognizable emoji everyone wants to see in every DeFi Telegram. Rocket will follow and support humanity's efforts to expand DeFi opportunities, as well to explore and conquer space.

Rocket Coin is the first cryptocurrency to combine the power of an emoji with the world of blockchain. By embracing the Rocket emoji as its symbol, it establishes a strong connection with crypto enthusiasts and meme culture. Owning Rocket Coin means being part of a vibrant community that represents the collective aspiration to soar to new frontiers.

Team Rocket

The main contract developer is Don Vito Corleone. Don is supported by his dedicated team of Rocketeers and are in it for the long space run. All team members are active and can be found in Rocket's Telegram.

Rocket is not just a one man enterprise though, it is also a community effort. All feedback and suggestions for further development, innovation and creation will be highly valued and sought at. All efforts will be appreciated and rewarded.

Rocket (🚀) Values

Rockets value's fun and innovation. To achieve this the team will build up and add utilities over time. Rocket has its own launch and swap platform and will build an ecosystem around Rocket. We also call upon all who want to take part to help and bring this enterprise to fruition. Rocket aims to stay relevant, interactive and innovative. Rocket will follow, engage and explore all things related to space travel, rocket development as well Artificial Intelligence (AI) development and possible DeFi adaptations and implementations.

Mission: Increase awareness about Rocket, DeFi, AI and space travel innovations, developments and launch dates. Rocket will pursue partnerships with people/projects/businesses involved with decentralized finance to improve utility development and community growth.

Vision: To unite people and have them banner under a shared interest, goal and purpose, to support rocket innovation for space travel and create a DeFi currency for space and beyond.

*"One small step for man,
one giant leap for mankind"*
- Neil Armstrong

Rocket will be by and for the people. It will thrive on community fun, engagement and growth. Rocket's team will lead, support and facilitate all efforts done by and for the Rocket community. Team Rocket will take lead and responsibility for Rocket's Space map.

Rocket wants the best and brightest stars in the community to shine. We go big or go home. We aim for the Moon, Mars and to go beyond the stars.

Rocket's Contract & tokenomics

Rocket contract is launched on the Binance Smart Chain (beb20) network on Pancakeswap.

Contract Rocket (🚀): 0x87374baef80590f5274bae9c2533e10b6a3a79b8

- Fair / stealth launched;
- Contract renounced;
- Liquidity pool 100% burned;
- Zero tax;
- Auto-burn mechanism;
- 500 Trillion total supply;
- No max limit per wallet.

Rocket's contract is safe and renounced. Its liquidity is 100% burned. The contract has an automatic burn function of 0.25% each time a buy and or sell takes place, making the token deflationary. Further strengthening of Rocket's liquidity will be an ongoing process. When using the Rocket swap automatic burns will also take place. Rocket is a zero tax project. Thus the team will set up ways to increase community governance.

Audit(s)

For safety and security reasons Rocket plans on being audited. A Certik audit would be preferable. This is costly however and since this is a zero tax project it will have to be paid out of pocket. For this reason we will start off with different free audits. Once the project has reached the 1 million market cap Rocket will apply for a Certik audit.

Rocket Swap

Rocket has its own swap platform on the website. When using the swap a small percentage of the token supply will be auto-burned. Making the token deflationary.

‣ From PancakeSwap: Ro...	To 0xb3becb41edf67...	For 0.00995 (\$3.00)	🔹 Wrapped BNB (WBNB)
‣ From 0xb3becb41edf67...	To 0x89d40eb4eb5ef...	For 0	🔹 (Rocket)

Rocket multi chain

Brace yourselves, interplanetary traders! The Rocket Coin bridge is officially LIVE!

Say goodbye to the limits of a single network, because now it is possible to swap ETH from the Ethereum network and purchase Rocket Coin on the Binance Smart Chain (BSC) directly through our website. In total there are 12 chains that can be bridged to buy the Rocket coin.

Development

Community development: This will happen over time, organically and progressively, by means of our dynamic marketing strategies and community efforts. As the community grows so will our team and development rate. Rocket aims to attract crypto, AI and space enthusiasts.

Team development: At this moment Rocket's team is still growing as well. The team consists of a core foundation of holders/developers doing this with and as a community effort. Each is active in a different timezone. More community members will be asked to become mods if they show dedication to the project, community, culture and our cause.

Token utility development: Rocket's token total supply is 500 trillion. Its supply is not scarce, but it is deflationary with the auto-burn mechanism. Using the Rocket Swap will also add to the burning of tokens. Additional utilities for the token like will be built over time.

Price development: The auto-burn function in Rocket's contract will make sure the price will move up over time with each transaction as supply becomes more scarce. It is a zero tax contract that will auto burn 0.25% of the supply. The auto-burn function by using Rocket's Swap will also make sure the price will move up over time with each transaction.

Liquidity development: The starting liquidity during deployment was 1 Bean and has been burned. Rocket will explore more ways to strengthen and diversify the liquidity pool by adding liquidity and pair's as well as increase the security by using different locking platforms.

AI implementation: Rocket will aim to implement AI bots and technology to make our crypto journey more fun, efficient and effective.

Partnerships development: Rocket will actively seek partnerships with people involved in the crypto space, be it with developers/other projects/influencers.

Marketing strategies

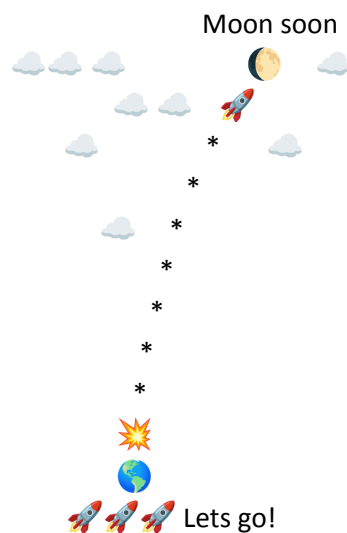

Rocket will implement different marketing strategies.

- Airdrops: Elon Musk - There was a time Elon was looking to buy Rockets. He will have to look no more. Elon can have our Rockets for free.
- Charity donations: Rocket will consider adding a charity wallet for donation/trading/buy-back purposes.
- Community power: Keeping our community members active and by facilitating them with the means to increase our exposure through daily tasks by means of our social media presence.
- Premier Emoji Coin: Rocket Coin is the first cryptocurrency to combine the power of an emoji with the world of blockchain. By embracing the rocket emoji as its symbol, it establishes a strong connection with crypto enthusiasts and meme culture. Owning Rocket Coin means being part of a vibrant community that represents the collective aspiration to soar to new frontiers.
- Fueling Meme and Emoji Projects: One of Rocket Coin's primary missions is to support and fuel the growth of emoji and meme projects. As the premier emoji coin on the Binance Smart Chain (BSC), Rocket Coin aims to become the currency of choice for developers and creators in this exciting niche. By aligning itself with these projects, Rocket Coin aims to become an integral part of the crypto ecosystem.
- Recognition and Identity/branding: With Rocket Coin, people will have the opportunity to own a coin that carries a recognizable and iconic symbol—the rocket emoji. Wherever you encounter this symbol in the crypto space, you'll know that you are part of the Rocket Coin community. By becoming a Rocket Coin holder, you become an ambassador for the project and its vision.
- Partnerships: Seek out partnerships with crypto influencers, work relations with other known developers.
- Influencers and callers: They will be asked to call for the culture and cause. In return Rocket will show our support back to them and make this part of our daily tasks.
- Social media: Rocket will make use of its social media to facilitate feel good stories and memes, as well as for marketing purposes. In the Telegram daily updates and shill messages will be provided for. Also Youtube live streams will be implemented and TikTok marketing and other innovative methods that come along.
- Promotion: Rocket will actively keep working with our community and partners. Focus on building out and maintaining networks and relations. Special promotional strategies can and will be implemented as well.

- Planned Ama's: Rocket will seek out and participate with AMA's on other platforms as well as hold its own for the community. This will keep the community informed and updated. \$Rocket will be able to gather feedback, receive suggestions, share experiences and will be able to improve community bonding.
- Lift-off to the Moon: Rocket is preparing for lift-off! By leveraging a dedicated team of experienced professionals and with the support of the Rocket community , this coin is positioned for success. With a clear roadmap and a commitment to transparency, Rocket Coin aims to build a sustainable and thriving ecosystem for its community members.
